

Each TeachNet online course contains five presentation modules. These contain the main content of the course and have been developed by teachers with a long track record in using ICT in the classroom. This is a step by step guide to using the module presentations. Remember that you will need speakers or headphones to use the presentations.

To use the module presentations, follow the following steps:

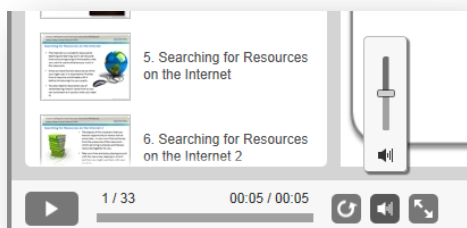

1. Click on the presentation link.

2. The presentation will open in a new window, a spinning timer will indicate that the presentation is downloading (time will depend on the speed of your connection).

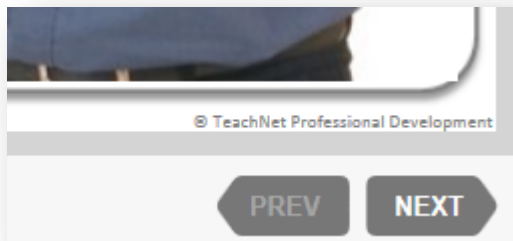

3. The presentation contains audio. Make sure you have your speakers or headphones (we recommend you use headphones) connected properly. Click on the speaker icon to adjust the volume.

4. The presentation will automatically move to the next slide.

5. You can move backwards and forwards through the slides.

6. Many presentations contain on-screen video tutorials. You will need to click on the play button at the bottom of the video window to play these.

7. Remember, you can close the module at any time by closing the browser window.
